IMPACT PROTECTION RATING

ANSI Z87+

A .25 inch steel ball (25 Caliber) traveling at a velocity of 150 ft/sec or 102 mph. No contact with the eye of the headform is permitted through deflection of the lens. This is meant to simulate particles that would be encountered in grinding, chipping, machining or other such operations.

150 FT/SEC
25 Caliber

BALLISTIC MIL-PRF-31013

The fragment is .15 inch (15 Caliber) traveling at a velocity of 650 +/- 10 ft/sec (440 mph). No impact failures are allowed at the velocity specified. The lens cannot fracture, nor can the projectile penetrate to the eye. The impact energy of this test is about 7 times that of a 1/4 inch steel ball traveling at 150 ft/sec.

FAT BELLY™ BULLET POINTS (6/PK)

Fat Belly™ Bullet Points are 3D target ready. Upon contact with foam targets, the Fat Belly™ Bullet Points' tapered shape creates a larger diameter impact channel than the arrow shaft, making them easier to remove than standard bullet points. Designed with Allen's Stay-Tight O-ring, which keeps points from vibrating loose, Fat Belly™ Bullet Points are a must have for any archer.

INTEGRATED O-RING
SYSTEM TO SECURE FIELD
POINT TO ARROW INSERT

Item#1490

ALL ALLEN STEEL FIELD POINTS ARE MADE TO AMO STANDARDS FOR THREAD SIZE, WEIGHT, AND DIMENSIONS WITH PRECISION MACHINED POINTS, AND A DURABLE FINISH FOR DEPENDABLE PERFORMANCE.

FAT BELLY SHAPE:

Head of bullet point is wider than arrow shaft, making removal easy.

STAY-TIGHT BULLET POINTS (6/PK)

Built-in O-ring system that keeps the point fully threaded into the arrow shaft by preventing it from vibrating loose. Great for today's high performance bows. This shape works well to slow the arrow in a foam target. The shape helps to limit target pass through.

BULLET POINTS (12/PK)

Originally designed for use in cardboard targets and foam targets, this shape works well to slow the arrow in a foam target. The shape helps to limit target pass through. Good for use with fast bows that create lots of energy. It creates less wear on foam targets than field points.
